USDA Hardiness Zone: 8a - 11

Growth Habit: Tree

Origin: Africa

Tony Pernas, USDI National Park Service, Bugwood.org

Description: Semi-deciduous tree to 7 m tall. Bark brown except on new branches where it is green and hairy. Alternate spines up to 8 cm long, recurved. Leaves bipinnate, dark green above, pale below, leaflets and stalks hairy. Flowers in a pink hanging spike of dense flowers (bottlebrush-like). Fruit a narrow pod, yellow to brown, twisted, 10 cm long with 4 black seeds.

Habitat: Hydric hammock

Comments: Vouchered in several counties from Monroe north to Dade, Palm Beach, and Polk. Grows in dense thickets via root suckering. Not tolerant of frost or water-logging.

Florida Introduction Date: specimen vouchered in 1929

Control Methods:

No specific recommendations available.
